Professional Summary

Detail-oriented and innovative ICT specialist with hands-on experience in software development, data management, and school communication systems. Adept at using PHP, MySQL, and Excel to automate workflows, manage data, and enhance institutional communication efficiency. Developer of the Parent Memo Notification System — a web-based platform that streamlines parent-school notifications and arrival confirmations. Passionate about building reliable digital systems that solve real-world problems and support organizational growth.

Core Strengths

- Proven ability to design, develop, and deploy functional web applications.
- Skilled in automating school communication and reporting systems using PHP and MySQL.
- Strong data management, analysis, and Excel automation skills.
- Fast learner with excellent problem-solving and troubleshooting capabilities.
- Committed to accuracy, teamwork, and continuous professional growth.

Technical Skills

Programming: PHP, JavaScript, HTML, CSS, SQL

Frameworks & Tools: Bootstrap 5, PHPMailer

Databases: MySQL

Data Analysis: Microsoft Excel (VLOOKUP, Pivot Tables, Data Cleaning, Data Validation)

Other: Data Entry Accuracy, Report Generation, Troubleshooting

Soft Skills: Communication, Teamwork, Critical Thinking, Time Management

Key Project

Parent Memo Notification System — PHP, MySQL, Bootstrap

Developed a comprehensive school-parent communication platform that allows administrators to send real-time notifications, confirm student arrivals, manage records, and generate reports. Improved communication efficiency and reduced manual follow-ups.
